

Most companies work from the faucet down..but Atlas is working from the cabinet hardware up! That's right..we're designing faucets now...to accompany all the other elements that have been previously designed, like cabinet hardware, bathware, and wall décor. The first faucet design, debuted to our Forte customers before anyone else is Sutton Place. This classic, but modern feeling faucet will pull together and up sell the entire Sutton collection. ( which many of you already carry in your Atlas mix)

Better yet, the faucet is being manufactured and sold by another Forte vendor, Altman's, and will be serviced by them also. They know what they're doing when it comes to water !
