

November 10, 2010

Dear Customer and Friend,

At OMNIA, we are constantly striving to expand our product line to the benefit of our customers. Our latest efforts culminate in additions to our line of Architectural Hardware. New designs of stainless steel cup pulls, flush pulls, door pulls and door stops are accompanied by first-time offerings such as a pocket door edge pull and pocket door locks.

For your future reference, please find enclosed a two-sided flyer featuring our new stainless steel Architectural Hardware on one side and our existing brass Architectural Hardware products on the other. It can be inserted under the "Door Trim" tab divider in your OMNIA product binder. We are currently in the process of designing a new *Architectural Hardware Catalog* and *Consumer Brochure* that will include these new products.

Display boards featuring these products are currently available for our rotating tower. A free-standing mount of our pocket door lock is also available. For display inquiries or additional literature, please contact our customer service department or your local OMNIA sales representative.

As always, we thank you for your continued support and business.

Best Regards,

A handwritten signature in black ink that reads "Alexander G. Comini".

Alexander G. Comini
