TOTO's Fall launch consists of many new products showcasing TOTO's design and innovation expertise. The new releases include individual products for line extensions as well as completely new collections:

Aimes Collection – Inspired by timeless design but with a twist of modernism, the Aimes collection features faucet, shower products, toilet and lavatory. The collection brings together historical inspirations with contemporary sleekness.

Upton Collection – Taking cues from contemporary design elements, the Upton Collection updates conventional geometric shapes with softer, more fluid edges. Upton presents a very versatile style for any luxury bath space as its major strength.

Aquia Collection – Aquia infuses organic design principles with soft contours, a mix of flat, square surfaces transitioning into smooth curves. The suite is very distinct in its metropolitan appeal, especially against the backdrop of the many stark, overly-squared designs in the market today.

Gyrostream – Only using 0.7 GPM, or 53-60% less than common bodysprays, water flowing through Gyrostream causes the nozzles to tilt and rotate, resulting in more consistent water distribution and warmth.

DuoFit In-Wall Tank System and Trim Plates– This high-efficiency dual flushing system optimizes water usage by allowing the user to choose 0.9 GPF for liquid waste or 1.6 GPF for solid waste. The decorative trim plates are available in three unique shapes and style, making this system a perfect choice for upscale residential or luxury hospitality projects.

Neorest II Vessel Lavatory – This lavatory's unique design is inspired by the way water forms on a sheet of ice and is made from Luminist, a material TOTO developed that is scratch and heat resistant. Soft white LED lighting in the bowl offers a relaxing glow while light also serves as a temperature indicator, emitting a red glow from beneath the control for hot water or blue for cold water.

Free-standing Tub Fillers – TOTO free-standing tub fillers are a modern take on a classic fixture. Available in two styles—single handle or two handle—these fixtures offer an updated look for more contemporary bathrooms designs.

Guinevere Oil Rubbed Bronze – The newest finish for the Guinevere collection, TOTO's oil rubbed bronze creates shades and highlights perfect for a traditional décor.
